Highly motivated and results-driven full-stack web developer seeking an opportunity to apply diverse background, technical skills, and passion for web development and design to make meaningful contributions to the tech industry. Skilled in various web development technologies including HTML, CSS, JavaScript, React, Node, etc. Possesses a keen eye for aesthetic design and the ability to generate creative ideas. Excited about staying current with new technologies and dedicated to continuous learning and professional growth.

Projects

Portfolio website - [Live](#) - [GitHub](#) repo - My personal single-page portfolio website. Built using HTML, CSS, Bootstrap and JavaScript.

Simple Pokedex app - [Live](#) - [GitHub](#) repo - A small web application written with HTML, CSS, and JavaScript that loads data from an external API.

Movie API and React client-side app - [Live](#) - [GitHub](#) repo - Movies web application. [The REST API](#) and architected database were built using JavaScript, Node.js, Express, and MongoDB, while the client-side was built using React and React Redux.

Angular movie client-side app - [Live](#) - [GitHub](#) repo - Another version of client-side movie app built using Angular.

Meet app - [Live](#) - [GitHub](#) repo - A serverless, progressive web application (PWA) written with React using a test-driven development (TDD) technique.

Chat app - [GitHub](#) repo - Simple Chat app with login, one chat room, picture and location attachment functions. The app is written with React Native, Expo, and Google Firestore Database.
